Needs and Uses: Incumbent local exchange carriers that want to recover their carrier-specific number portability costs must file tariffs and cost support with the Commission for federal end-user charges. These tariffs and cost support must detail both the nature and specific amount of those carrier-specific costs that are directly related to number portability, and those carrier-specific costs that are not directly related to number portability. The Commission will use this information to ensure that the end-user charge recovers the incumbent LECs' cost of implementing and providing number portability in a competitively neutral manner.
